### Impressions of the career event at Otto von Guericke University Magdeburg

- On 20 and 21 October 2021, the Otto von Guericke University Magdeburg's company contact fair celebrated its 19th anniversary as a hybrid career event. Numerous students and alumni took advantage of the opportunity to talk to more than 70 companies and start-ups from the region as well as all over Germany and find out about topics such as starting a career. Numerous online lectures, the creation of application photos, networking in the start-up lounge or at the trade fair stands - these and even more highlights were to be discovered by the participants this year.

After the company contact fair was offered as a digital event last year, the companies and the participants were particularly pleased to exchange information directly on site about professional entry opportunities and career opportunities in various sectors such as mechanical engineering, information technology or human resources management.

Whether internship, thesis or career entry - the company contact fair had the right offer for everyone. Using the jobteaser platform, students and alumni can choose from hundreds of offers to find the one that suits their skills.

We have compiled a few impressions of the two days of the fair below.

### Firmenkontaktmesse (Career Fair) on DIGITAL ways

On the platform firmenkontaktmesse.expo-ip.com, around 50 well-known companies provide information about career entry opportunities and career opportunities. Just like at a real trade fair, you can meet information, videos and people at the digital exhibition stands and talk directly to HR managers. There is also an attractive program of lectures on interesting career topics.

### Firmenkontaktmesse (career fair) - new design

Firmenkontaktmesse (career fair) has changed its website. The new website is much more modern and, above all, responsive. The usability and the performance has been improved.

Another innovation is the connection of the job exchange to the OVGU job exchange "JOBTEASER", which was introduced at OVGU last year.
